

Balsam Fir Boughs

-Best Management Practices-

- The Best Balsam Fir trees for Boughing are often healthy young trees more than 7 feet tall
- Make sure you are collecting from an area that you are allowed to do so. At Bois Forte, MCT lands that are not within the village boundaries are acceptable for band members.
- Bois Forte Forestry recommends areas between sucker trail and palmquist housing, and can provide maps to where MCT lands are.
- Don't harvest from the top ~60% of the tree

-Don't harvest from unhealthy or diseased trees

-Don't damage or break the main stem
